Documentation Of dataset Salary Prediction
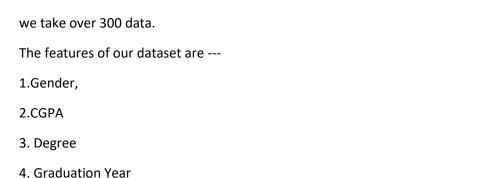

I. The size (i.e., number of samples and number of features) of the dataset.

we take over 300 data.

The features of our dataset are ---

1.Gender,

2.CGPA

3. Degree

4. Graduation Year

5. Coding Skill

6. Problem solving skill

 7.communication skill

8. Research

9. Years of experience

Description of features with their units.

First, We take string type data for degree and gender. Then we encoded through label encoder to encode string to numeric. And we took numeric type data for other columns.
